

Personal Information:

Name: Stanislav Dušek

Date of Birth: 1984 - Šternberk

Nationality: Czech

Address: Hlavní třída 874/24, Ostrava

Tel (mobile):

Email: standa.dusek@gmail.com

Objective:

I would like to develop my network skills to the level being able to work as a network/security architect in future.

Summary:

- 3.5 years working as a part of IS infrastructure operations team in automobile company
- 3.5 years working for one of the biggest nordic outsourcing company as a network specialist.
- 1 + year working in service provider as a security engineer
- CCNP,CCSA, Stonesoft FW certificates, Junos certificates, would like to obtain security role certificates (CISSP, OSCP, CEH etc) and Linux+
- High school diploma
- Upper intermediate english

Professional Experience:

Okin BPS, Ostrava **07/16 – now**

Assigned client engineer

As engineer assigned to client my responsibility is to take care about escalated network issues regarding this customer.

Netscalers, ASA, Nexuses are the technologies widely used inside the client infrastructure so most of the daily routine work is done on them.

Interoute Czech s.r.o., Prague **09/14 – 06/16**

Security operations engineer

Taking care of ASA, Checkpoint, JunOs, ScreenOs Juniper FWs, F5 LBs (LTM, GTM – basics), SourceFire IPSes (very basic) and Bluecoat proxies (slightly), JunOs pulse basic configurations, SafeNet, Symantec proxy cloud. L2L and RA VPN (full tunnel, clientless) on the platforms. Managing and maintaining the platforms (rulebase, configurations, upgrades etc.). We are also provisioning these devices (especially Checkpoint, ASA FWs, F5 LBs) to the customers which involves participating on preparations, customer meetings, design, installing, handover to production.

Tieto Czech s.r.o., Ostrava **09/10 – 02/14**

Network specialist 2nd level support- Systems Engineer

2 years working as a 24/7 shift specialist and 1.5 year on day shifts in FW/network team.

Work was based on tickets requests made by customers and corporate users.

I was taking care of several customers (ABB, Wartsila, Hurtigruten, Finland state treasury, Sanoma, Metsallito, Outokumpu) and their infrastructures in their premises as well as Tieto's Dcs. The biggest part of the service was to handle FW opening requests, routing and troubleshooting activities regarding them.

- Handling network devices alarms (HP openview, Entuity)
- Handling tickets in Remedy and Tone systems
- Rulebase administrator of Juniper SSG, JunOS, Stonegate, Checkpoint and slightly ASA and PIX Fws.
- Server instalations (preparing L2 network infrastructure)
- Troubleshooting L3, L2, FW issues in company DCs and customers infrastructures
- MPLS VPN L3 routing updates (updating and creating route maps, prefix lists, implementing new VRFs, making small design decisions according to the company design rules)
- Was a part of Mill In Box team (making L2, L3 infrastructure for ESX boxes based on Juniper JunOS and HP switches, clustering small JunOS FWs boxes at customer premises especially in Finland – ABB, Metsalito, Stora Enso. Participating on network surveys, implementations at their premises.
- Supporting junior colleagues all over the portfolio. Daily communication to L3 support guys.
- Trained for solving basic tasks on BigIP loadbalancers but never had any practical task.
- Basic knowledge of WIFI technologies made by Cisco and HP
- Basic knowledge of VMware technology.
- Incident, change, problem management

Information systems infrastructure specialist

1 year working as a team assistant and 2 years as an infrastructure specialist focused on networks.

- Taking care of team hinterland (attendance system, invoices etc.)
- User support (supporting more than 500 users), Servicedesk ticketing system.
- Maintaining and administering servers according to the company manuals (Linux, Unix, Windows, Exchange)
- Maintaining administering Active Directory
- Taking care of printers (CANON, Xerox, many small brands as well as the printers for special usage)
- Wmware vurtual machines instalation and maintaing
- HiPath 4000 PBX administration (DECT phones handling, creating numbers, renumbering etc...)
- VoIP based on Cisco devices. Telephones handling, basic call manager tasks.
- Administering network based on Cisco technologies (more than 200 devices), changing cracked switches for the new ones, configuring vlans, access-lists on distribution layer, physical cleaning together with vendor, making a new metalic cabling together with vendor all over the factory.
- ASA FW adminstering (mostly creating rules)
- Blackberry infrastructure administration (taking care of telephones, creating rules on BB server, troubleshooting, OS upgradng)
- Solving problems according to a PDCA and A3 report.
- Participating on the network geographical separation project (new server room building, fiber optics separations, network devices relocations, taking care of more than 50 contractor guys).

Education:

Střední odborné učiliště Litovel **09/1999 – 06/2003:**

High school diploma - Electronical mechanic

Certifications:

CCNA – 11/2010

CCSA – 12/2013

CCNP – 06/2013

JNCIA – 2015

JNCIS-SEC – 2015

CCSE – in preparations

Linux+ - in preparations

Technical Skills Summary:

Network: CCNP level(OSPF, BGP,switching,troubleshooting), Cisco, JunOS (3300, 4200), HP switches

FW Administration: Juniper SSG+JunOS, Checkpoint, ASA, Stonesoft

Operating Systems Basic Administration: GNU/Linux, Windows

Personal Skills:

Team player. I hope I am able to learn new things and adapt to a new situation quickly.

Trying to support anyone, anytime.

Weaker administration, organization skills.

Languages:

- Czech – Native
- English – upper intermediate
- Spanish – total beginner (one semester)
